FOR IMMEDIATE RELEASE

Spectrum Announces Availability of the SpectrumSCM Plugin for the Open Source Eclipse 3.0 Platform

Atlanta – July 22nd, 2004: Atlanta-based Spectrum Software, Inc., a systems designer and developer of software productivity tools, announced today the immediate availability of an updated plugin to integrate SpectrumSCM[®], its enterprise Source Configuration Management tool, with the latest version of the Eclipse Platform -- Eclipse 3.0. Eclipse is an award-winning universal platform for tools integration, software modeling and testing that has been broadly adopted by commercial vendors, academic institutions and open technology developers.

SpectrumSCM is the first truly integrated, platform independent, full-featured (*Version Control, Issue Tracking, Change Management, Process Management/Control, Workflow, Release Management, Parallel Development*) source configuration management system in the market place that provides full CM functionality. SpectrumSCM is a flexible, process based system that can be used to manage the entire project lifecycle. SpectrumSCM provides comprehensive source configuration management for any 'e-Asset' from origination through delivery, maintenance, and support.

The new plugin is an upgrade to the already existent plugin for Eclipse 2.1. The integration of SpectrumSCM with the open source Eclipse platform brings advanced software configuration management features not only to the Eclipse IDE, but also to all applications and plug-ins that are built for or on top of the Eclipse platform. "The integration of SpectrumSCM and the Eclipse platform provides current Eclipse users with powerful version control, issue tracking and process management features. It also provides direct SCM integration for new development environments that are based on the Eclipse platform itself, like IBM's WebSphere Studio Application Developer." added Adrian Raybould, Director of Software Development at Spectrum Software.

"This is yet another reflection of our commitment to support and enhance the use of SpectrumSCM with technology that is very popular amongst developers. It has further demonstrated that SpectrumSCM offers a proven combination of value and functionality that is only available in truly integrated tools like SpectrumSCM. In the past year, SpectrumSCM has been seen as a very powerful and affordable alternative to many of the available peer CM solutions. It has now enabled organizations, small and large, to implement a solid, cost-effective enterprise wide CM solution without having to doubt their investment." added Sarathi Srinivasan, President and CEO, Spectrum Software Inc.

Availability

SpectrumSCM, is available directly from Spectrum Software, Inc. For pricing, demos and sales information, please contact Spectrum sales representative (email: sales@spectrumscm.com) at 770-448-8662 (North America).

About Spectrum

Spectrum Software is a decade plus-old, proven software systems design and services firm providing cost-effective, efficient and quality software products and services to large and small businesses.
