**FOR IMMEDIATE RELEASE**

**SpectrumSCM 2.2.3 Release Adds Support for the Latest Java Version 1.5**

*Adds New Enhancements for VB, .Net and Eclipse IDE Integrations*

**Atlanta – July 22<sup>nd</sup>, 2005:** Atlanta based Spectrum Software, Inc., a systems designer and developer of software productivity tools, announced today the general availability of the new release of Spectrum's enterprise Source Configuration Management tool, **SpectrumSCM<sup>®</sup> Version 2.2.3**. This newest release includes JVM 1.5 support, enhancements to Microsoft SCCI Plug in, support for the latest Eclipse 3.1 platform, upgrades to its work flow engine to enable file based auto-builds and many more.

SpectrumSCM is a flexible, process based system that can be used to manage the entire project lifecycle. SpectrumSCM provides comprehensive source configuration and management for any 'e-Asset' from origination through delivery, maintenance, and support. SpectrumSCM<sup>®</sup> is the first truly integrated, platform independent, full-featured (*Version Control, Issue Tracking, Change Management, Process Management/Control, Workflow, Release Management, Parallel Development*) source configuration management system in the market place that provides full CM functionality with one fully integrated SCM system.

**SpectrumSCM Version 2.2.3 feature list.**

- Support for Java ( JVM ) 1.5
- Enable full regular expression filter specifications in the workspace synchronization feature
- Enhancements to Load Source Tree feature
- Enable File based Auto-build in its work flow engine
- Enhance SCCI integration to better handle VB6, VS.Net
- Support for Eclipse 3.1 Platform
- Additional Enhancements to security features
- Module definitions can now be shared between users
- Contiguous and Non-contiguous multi-selects are now fully supported for Mac Users
- Enhanced Work Breakdown Structure Dependencies between Make-File-Common CRs

**Availability**
